Market Pressure!

Vote with your wallet,
and tell vendors why.

“We bought 10,000 Foo Phones
because they have a true remote wipe
(FDE, destroy key) and Bar Phone
doesn't.”

Competition!

Solve Android's problems by taking advantage of its open source nature: roll your own distribution with the features you need.

I'd buy it. Please sell it to me.

Bronze medal: New security features.

Silver medal: Solve the rare and irregular updates problem and the Linux kernel version problem.

Gold medal: Solve the insecure baseband OS problem.
